latex

COMPACT COMFORT FOR HIGH BREATHABILITY

## DESCRIPTION AND COMPOSITION:

Elastic ear loops

Includes a fastening clip around the neck for a more comfortable wear. With 3 adjustment positions:

Foldable filter mask designed to offer low breathing resistance. Made from **highly breathable** filtering material. **Ergonomic body designed to minimise interior condensation**. **Semi-pyramidal shape** that creates an inner chamber, **making it more comfortable to wear and minimising contact with the skin**.

**Includes an adjustable metallic nose clip** and elastic ear loops, allowing for a better fit. The nose clip is enclosed in a sealed cavity to provide greater comfort during use, while also ensuring that it doesn't become accidentally detached from the filter mask.

The **elastic ear loops** exert minimal pressure on the wearer's ears, for a more comfortable wear throughout the working day. The **loops are attached to the mask via a double heat-sealed seam**. This ensures twice the resistance, preventing the mask from slipping off easily. **Includes a fastening clip** for adjusting the loops around the neck instead of the ears. The user may choose how to adjust it according to what is more comfortable for them.

The 9P Series has **frontal and peripheral heat-sealed seams**, and features four additional seams for greater resistance. The peripheral heat-sealed seam is in parallel, increasing adhesion between the filter layers.

One size. Individually packaged

Presentation: 50 bags of 1 unit per box

**Does not contain graphene.**

Ref.	Product	Features	
		Types of adjustment	Size
914599	Box of 50 FFP2 NR filter masks	Elastic ear loops	One size

# RESPIRATORY PROTECTION

MARKING INFORMATION	
Standard and Certification	EN 149:2001+A1:2009

COMPONENTS	
Silicone	Not present*
Metal	Present
Latex	Not present
Graphene	Not present

\* Although this PPE does not contain silicone, it is recommended to perform tests and try the product in painting areas before use.

OTHER FEATURES							
Uses	Provides protection against solid and liquid particles. Must not be used for filtering out gas or vapour. Do not use in atmospheres with less than 17% oxygen content volume, nor in explosive atmospheres. Inert dust and aerosols that do not affect the respiratory tracts. USES: Sanding, deburring, grinding, drilling, construction, quarrying, etc. Protection against allergens/ biologicals, pollen. Agriculture, livestock and forestry sector, and in general for sectors that require protection against dust, aerosols and fumes.						
Conservation Storage Expiry	Store in storage case in a cool, well ventilated place, avoiding humidity, dirt and dust.						
Instructions Use How to use	Discard the mask after use (maximum usage time: one work day). Single use masks. Discard mask if breathing becomes difficult. This item filters contaminated air, but it does not provide oxygen. Thus, it must not be used when the ambient oxygen content is below 17% volume.						
Presentation	Boxes of 50 units (Individually packaged).
