

P2 Vertical with active carbon

Respiratory protection: Filter Masks

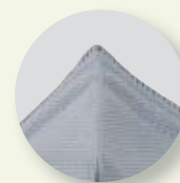

Description and Composition:

Mask with vertical design for optimal fit. Its design offers a wider field of vision: it allows a greater visual field with respect to other masks. Incorporates an adjustable nose clip with foam inside. Latex free double adjustment rubber strap.

Exhalation valve to provide additional comfort in hot environments and avoid heat and humidity build up inside the mask. Its active carbon pre-filter removes odours. Foldable design and packed in individual bags for easy transport and storage.

Maximum level of use: <12xTLV

FFP2 NR

Adaptable clip

Grey anti-dirt

Presentation in individual bags

Weight	20 gr.

Respiratory protection: Filter Masks

Standard and Certification	EN 149 CE
Applications	<p>Protection against low-to-average toxicity solid (non-oil) and liquid (oil) aerosols in concentrations up to 12xTLV. Smokes containing materials such as: cement, cellulose, carbon, aluminum... Nuisance odors out of organic vapors. Never use to filter gases or vapors.</p> <p>Do not use in environments containing less than 17% oxygen by volume, nor in explosive atmospheres. Inert dusts and aerosols that can affect the respiratory tracts.</p> <p>Limit value between 10 mg/m³ and 0.1 mg/m³ (12 x TLV).</p> <p>USES: sanding, deburring, grinding, drilling.</p> <p>Construction. Metal working foundries. Biological/Allergens: fungi, viruses.</p> <p>Agriculture, livestock sector. Mining/Quarrying. Ceramics.</p>
Maintenance Storage - Expiry date	Store the equipment in its package, in a cool, well-ventilated place, avoiding moisture, filth and dust.
Instructions Use - How to Empl	Dispose of the mask after use. Designed for one-time use only. Dispose of the mask if it offers great resistance to breathing.
Presentation	Box of 20 units. Carton of 20 boxes.
