IMPACT PROTECTION AND ANTI-SCRATCH COATING:
Safety for strong and long-lasting spectacles

SAFETY SPECTACLES with a modern design **FOR INDUSTRY**, with clear sides for 180° vision.

The **VEIKA** model's wrap-around design is coupled with the transparency of the frame for clear, unobstructed vision. Available in **NEUTRAL** (non-prescription) and **PRESCRIPTION** versions.

This model is designed for taking care of workplace safety and eye health.

- **BIO POLYAMIDE** and TPU frame: **LIGHTWEIGHT materials with HIGH impact and chemical RESISTANCE.**
- Excellent **top, side, and bottom protection** with **clear sides** to provide **unobstructed vision.**
- **Temples with a metal core** that allows them to be adjusted without the use of tools, simply by hand.
- **Size M** specially developed to fit a wide range of head shapes.
- **2 colours: CLEAR and BLACK.** The **VEIKA** with black frame is available in the prescription version only.
- The curvature of the lens allows for **higher prescriptions** to be mounted.

MATERIALS	
Frame	BIO POLYAMIDE and TPU
Temples	BIO POLYAMIDE, TPU and metal (stainless steel) 126 mm
Lenses	Base 5, Polycarbonate (in the case of the neutral non-prescription version).
Calibres	51x19 - 126 mm

OTHER COMPONENTS	
Silicone*	Not present
Latex*	Not present
Metal	Present

* Although this PPE does not contain latex or silicone, it is recommended to perform tests and try out the product in the areas where it is going to be used.

MARKING INFORMATION

Standards and certifications

UNE-EN 166:2002 Personal eye protection. Occupational safety
UNE-EN 170:2003 Personal eye-protection - Ultraviolet filters. Occupational safety. Grade 2C-1.2: maximum spectral transmittance for $T(\lambda)$ ultraviolet light at 313 nm (0.0003%) and at 365 nm (10%). UV 400
UNE-EN ISO 4007:2012 (Ratified) Personal protective equipment - Eye and face protection
UNE-EN ISO 8980-1, Specifications for single-vision and multifocal lenses
UNE-EN ISO 8980-2, Specifications for progressive lenses
EU 2016/425 Regulation (Class 2 PPE) / **ISO 9001:2015**

PRESENTATION

NEUTRAL spectacles (non-prescription):
1 unit polybag
Box of 10 units
Carton of 120 units

PRESCRIPTION spectacles:
Case, spectacles retainer and cleaning cloth. The prescription spectacles include a customer card indicating their prescription.

CORRECTIVE lenses in different MATERIALS, TREATMENTS, and PRESCRIPTIONS

FULL ADAPTABILITY TO ALL WORKING CONDITIONS

- **CERTIFIED ANTI-SCRATCH COATING** (EN166 Standard): more resistant and long-lasting lenses (All K-marking materials).
- **ANTI-REFLECTIVE COATING** providing a greater level of **LONGER-LASTING EYE COMFORT**.
- **PROTECTION AGAINST IMPACTS** of low energy and high speed at extreme temperatures in polycarbonate (FT marking) and with an increased organic and mineral resistance (S marking).
- The design of the **VEKA** spectacles (base 5) **HELPS THE PROGRESSIVE LENSES TO BE ASSEMBLED CORRECTLY**: suitable model for all types of corrective lenses, including higher prescriptions.

PLUS EXTRA TREATMENT IF REQUIRED:

- **PROTECTIVE FILTER AGAINST HARMFUL LIGHT: Tested according to EN ISO 18526 (Point 9.2)** on the transmittance of blue light emitted by screens, mobile phones, and similar devices. It helps prevent blurred vision and headaches, and eye ageing in the long term.
- **ANTI-FOGGING COATING**: They guarantee superior performance and excellent efficiency when masks and spectacles are worn together, and in environments with sudden changes in temperature.
- **ULTRACLEAN COATING**: Repels water droplets, dust, dirt, and grease to keep the lenses cleaner and to make work safer for longer.

HEALTH AND SAFETY: All that NON-PRESCRIPTION LENSES have to offer

- **ULTRAVIOLET PROTECTION: Certified under the EN 170 standard (Grade 2C-1.2) for UV transmittance at 313 nm and 365 nm. Prevents** UV radiation from penetrating the lens, thereby protecting the eye's structures against cumulative damage.
- **CERTIFIED ANTI-FOGGING COATING (EN166)**: They guarantee superior performance and excellent efficiency when masks and spectacles are worn together, and in environments with sudden changes in temperature. **(N marking)**.
- **ANTI-SCRATCH COATING CERTIFIED** under the EN166 occupational safety standard: more resistant and long-lasting lenses **(K marking)**.
- **PROTECTION AGAINST IMPACTS** of low energy and high speed at extreme temperatures in polycarbonate **(FT marking)**.

OTHER FEATURES

Uses	Jobs with IMPACT risks ● Spectacles designed to provide wraparound protection ● Jobs with exposure to ULTRAVIOLET LIGHT Typical jobs: industry in general but especially recommended for laboratories, chemical industry, cement plants, mining, construction (work with concrete or plaster, painting, plumbing, waste water treatment), food industry (dairy, meat, beverages), automotive industry, etc.
Preservation, storage and expiry date	For better conservation of the spectacles, they must be stored in a cool and ventilated place, away from moisture, dirt and dust. It is recommended that you use a suitable case for storage and transport.
Tips and directions	Spectacles should be regularly cleaned with clean, warm water and soap, no abrasives or solvents. Rinse in water and dry with a clean, soft and absorbent cloth. For a more thorough cleaning (disinfection), please use a dry cloth dipped in alcohol. Never use any other type of solvent. It is necessary to regularly inspect the state of the spectacles , and replace them if they have deteriorated in any way.
